GLOBALGRID® Decking

GLOBALGRID decking is made with pristine fiberglass and polyester resin materials to provide the exceptional properties of high strength and light weight.

GLOBALGRID decking is the clear choice of decking materials because of its outstanding features such as environmental benefits, safety and lowest cost over project life:

- No wood ingredient
 - Preserving trees and other natural resource
 - Excellent resistance to mildew, fungi and bacteria
 - Fire Retardant and moisture resistant
 - Dimensional stability in cold or hot temperature environments
- Durable and long lasting lightweight composites
 - Uniform and attractive appearance
 - Corrosion resistant and stable in most environments
 - No rust and no leaching from the material, preserving the environment where the decking materials are used.
 - Ergonomic and anti fatigue (compared to metals)
- Durable and slip resistant grit surface with custom colors
 - Long lasting attractive appearance
 - Excellent slip resistance in wet or slick environments
 - Maintenance free, eliminating the repair and repaint needed for other decking materials (minimum disturbance to the environment)
- Lowest Cost
 - Lowest installation cost (large panels customized for quick and durable installation)
 - No or minimal maintenance cost (Maintenance free)
 - Competitive materials cost to Metal or recycled plastics

GLOBALGRID decking is used in many marinas as docks, walkways, gangways, knee brackets, transition plates, utility covers etc. It is approved by National Park Service and Army Corp of Engineers for marina projects in the US.

GLOBALGRID Decking Applications

1) Globalgrid Decking as Utility Cover, Knee Bracket and Walkway

2) Globalgrid Decking as Gangway and Transition Plate

3) Globalgrid Decking as Performance Platform

4) Globalgrid Decking as Docks/Walkways

5) Globalgrid Decking as Finger Walkways

6) Globalgrid Decking as Main Walkways
